DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Suzuki et al(EP884321).

The claims are drawn to a dermal agent comprising a therapeutically effective amount of a compound which is represented by the formula 3(as shown in instant claim 1).

Suzuki et al(EP'321, hereafter) teach a cosmetic or medical preparations that contains L-ascorbic acid 2-phosphate zinc salt as an active ingredients, see examples 3-4 at page 6. Thus, all the critical elements required by the instant claims are taught by the cited reference.

EP'321 also teaches about the antimicrobial effect and excellent stability accompanied by the active agent(i.e. L-ascorbic acid 2-phosphate zinc salt), see test examples 1-2, at page 5. EP'321 further teaches the intended use of the composition as antidandruff or antiseptic agent due to the said antimicrobial activity and the liberation of the active species(i.e. L-ascorbic acid) in vivo, see page 2, lines 28 and page 3, lines 1-3. Regardless of the said teachings such as liberation of active species(i.e. L-ascorbic acid) or antimicrobial activity, it is noted that all the limitations

Art Unit: 1614

recited in the claims 2-6 are met inherently by the composition taught in the cited reference.

Applicant is reminded again that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

For instance, EP'321 utilizes that the cosmetic or medical preparation(topical formulation) containing a therapeutically effective amount of same active agent(i.e. L-ascorbic acid 2-phosphate zinc salt). Whether the prior art mentions specifically about the antimicrobial effect against specific organisms, the said preparation would have been possessed the same antimicrobial activity when it is used topically into the skin.

Applicant is reminded that the claims are drawn to the composition and all the structural requirement is taught by the cited reference. Thus, the claims are met and not patentably distinct over the prior art of the record.

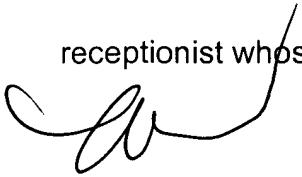

Conclusion

No claim is allowed.
